

SPIROL®

TWIST-LOK™ PINS

C75200 Nickel Silver is a copper alloy that is used for lightly loaded applications where cosmetic finish and corrosion resistance are important. This material is easy to work with, has a bright silver finish and is a cost effective alternative to austenitic stainless steel or plating.

Spirol® Twist-Lok™ Series HP300 Pins replace costly screw machined pins and eliminate problematic installation of screws and rivets. The helical knurl minimizes stress during installation by rotating as it engages the hinge. Corrosion-resistant material and a rounded burr-free head improve installed appearance. Axial and radial forces induced in the hinge eliminate the tendency for the pin to creep and maintain hinge tension.

METRIC SPECIFICATIONS			
Diameter "D"	Head Diameter "H"	Length "L"	Length "X"
1.60	2.85	6	4.5
		8	6
		10	7.5
Standard material: Nickel Silver UNS C75200 / CuNi18Zn20 (N).
